

able upon request. The only exception is industry composition in the June 2024 survey (excluded from the main text), where the correlation is 0.74. This results from a higher “Other Services” share in the RPS than in the CPS, a recurring issue in past RPS waves Bick and Blandin, 2023. We attribute this to respondents selecting “Other” when unsure of their industry, unlike in the CPS, where professional coders classify responses. To address this, starting in the August 2024 survey, we prompted those selecting “Other Services” with the following question: “We would like to know some more details about what kind of business or industry this job is. Please include the main activity, product, or service provided at the location where you are employed. (For example: elementary school, residential construction).” We provided an open text field for respondents to type their answers. These responses were routed to an industry and occupational coder at the National Institute for Occupational Safety and Health (NIOSH) (<https://csams.cdc.gov/nioccs/SingleCoding.aspx>). Based on the provided responses, the system suggested the top five 6-digit NAICS codes plus an “Other” option. We assigned industry based on their choice, with “Other” being classified as “Other Services - Other Personal Services.” Figure A.3 confirms this resolved the issue.

A.4 Definition of Industries and Occupations

Industries correspond to the 22 major industries in the NAICS: Agriculture, Forestry, Fishing, and Hunting (NAICS=11); Mining, Quarrying, and Oil and Gas Extraction (NAICS=21); Utilities (NAICS=22); Construction (NAICS=23); Manufacturing (NAICS=31-33); Wholesale Trade (NAICS=42); Retail Trade (NAICS=44-45); Transportation and Warehousing (NAICS=48-49); Information (NAICS=51); Finance and Insurance (NAICS=52); Real Estate and Rental and Leasing (NAICS=53); Professional, Scientific, and Technical Services (NAICS=54); Management of Companies and Enterprises (NAICS=55); Administrative and Support and Waste Management Services (NAICS=56); Educational Services (NAICS=61); Health Care and Social Assistance (NAICS=62); Arts, Entertainment, and Recreation (NAICS=71); Accommodation and Food Services (NAICS=72); Other Services (except Public Administration) (NAICS=81); Public Administration (NAICS=99).

The industry groupings used in the main text figures are: Agriculture / Extraction (sectors 11, 21), Construction (23), Manufacturing (31-33), Wholesale / Retail Trade (42, 44-45), Transportation / Utilities (22, 48-49), Info Services (51), Finance / Real Estate (52, 53), Professional / Business Services (54, 55, 56), Education / Health/ Social / Public Services (61, 62, 92), Leisure / Accommodation / Other (71, 72, 81).

Occupations correspond to the 22 major occupations in the SOC: Management Occupations (SOC=11); Business and Financial Operations Occupations (SOC=13); Computer and Mathematical Occupations (SOC=15); Architecture and Engineering Occupations (SOC=17); Life,

Physical, and Social Science Occupations (SOC=19); Community and Social Service Occupations (SOC=21); Legal Occupations (SOC=23); Educational Instruction and Library Occupations (SOC=25); Arts, Design, Entertainment, Sports, and Media Occupations (SOC=27); Healthcare Practitioners and Technical Occupations (SOC=29); Healthcare Support Occupations (SOC=31); Protective Service Occupations (SOC=33); Food Preparation and Serving Related Occupations (SOC=35); Building and Grounds Cleaning and Maintenance Occupations (SOC=37); Personal Care and Service Occupations (SOC=39); Sales and Related Occupations (SOC=41); Office and Administrative Support Occupations (SOC=43); Farming, Fishing, and Forestry Occupations (SOC=45); Construction and Extraction Occupations (SOC=47); Installation, Maintenance, and Repair Occupations (SOC=49); Production Occupations (SOC=51); Transportation and Material Moving Occupations (SOC=53).

The occupation groupings used in the main text figures are: Personal Services occupations combine SOC codes 31-39: Healthcare support, Protective services, Food preparation and serving, Cleaning and maintenance, and Personal care. Blue Collar occupations combine SOC codes 47-53: Construction, Extraction, Installation, Maintenance and Repair, Production, Transportation, and Moving.

We elicited respondents’ job titles through a free text response with autocomplete suggestions covering over 40,000 occupations from O*NET and the Occupational Outlook Handbook and then match them to Standard Occupation Classification (SOC) codes using a parsing algorithm that identifies occupations in 97 percent of cases. For job titles that do not exactly match a unique SOC code, we present respondents with a choice of probabilistic matches using the job title to SOC code matching algorithm developed by the National Institute for Occupational Safety and Health (Laughlin et al., 2024).

A.5 Reasons for Not Using Generative AI at Work

In the November 2024 wave, we asked people who know about genAI but do not use it at work the following question.

You indicated that you do not use Generative AI for your job. Below is a list of common reasons why people do not use Generative AI for their job. Please select all that apply to you.

The answer options were:

1. Generative AI cannot help with my job.
2. I am unsure how to use Generative AI effectively for my job.
3. My employer does not allow me to use Generative AI.

4. I am unsure whether my employer allows me to use Generative AI.
5. I feel pressure from coworkers to not use Generative AI.
6. I have privacy or security concerns.
7. I have ethical concerns.
8. I am skeptical about the quality and accuracy of AI-generated output.
9. I am worried that using Generative AI could eventually replace some or all parts of my job.
10. I am worried that using Generative AI would dilute my personal style or the creativity and authenticity of my work output.
11. Other reasons

We then followed up with the following question, displaying only the answer options selected in the previous question.

You indicated that you not using Generative AI for your job for the following reasons. Please rank these tasks from “most important” (top) to “least important” (bottom) by dragging them.

B Comparison of Generative AI Use in the June (Pilot), August, and November 2024 Waves

FIGURE B.1: Share of Working Age Adults Using Generative AI

Notes: The figure shows the share of respondents who use genAI for work, outside of work, and overall (either for work or outside of work). Intensity of use is broken down into every day last week (dark blue), at least one day but not every day last week (medium blue), and not last week (light blue). Data source is the June 2024 wave of the RPS (Panel a), the August 2024 wave (Panel b), and the November 2024 wave (Panel c). The “For Work” samples are employed individuals (June, $N = 1573$; August, $N = 3238$; November, $N = 3697$). The other bars include all respondents (June, $N = 2351$; August, $N = 4704$; November, $N = 5022$).
