

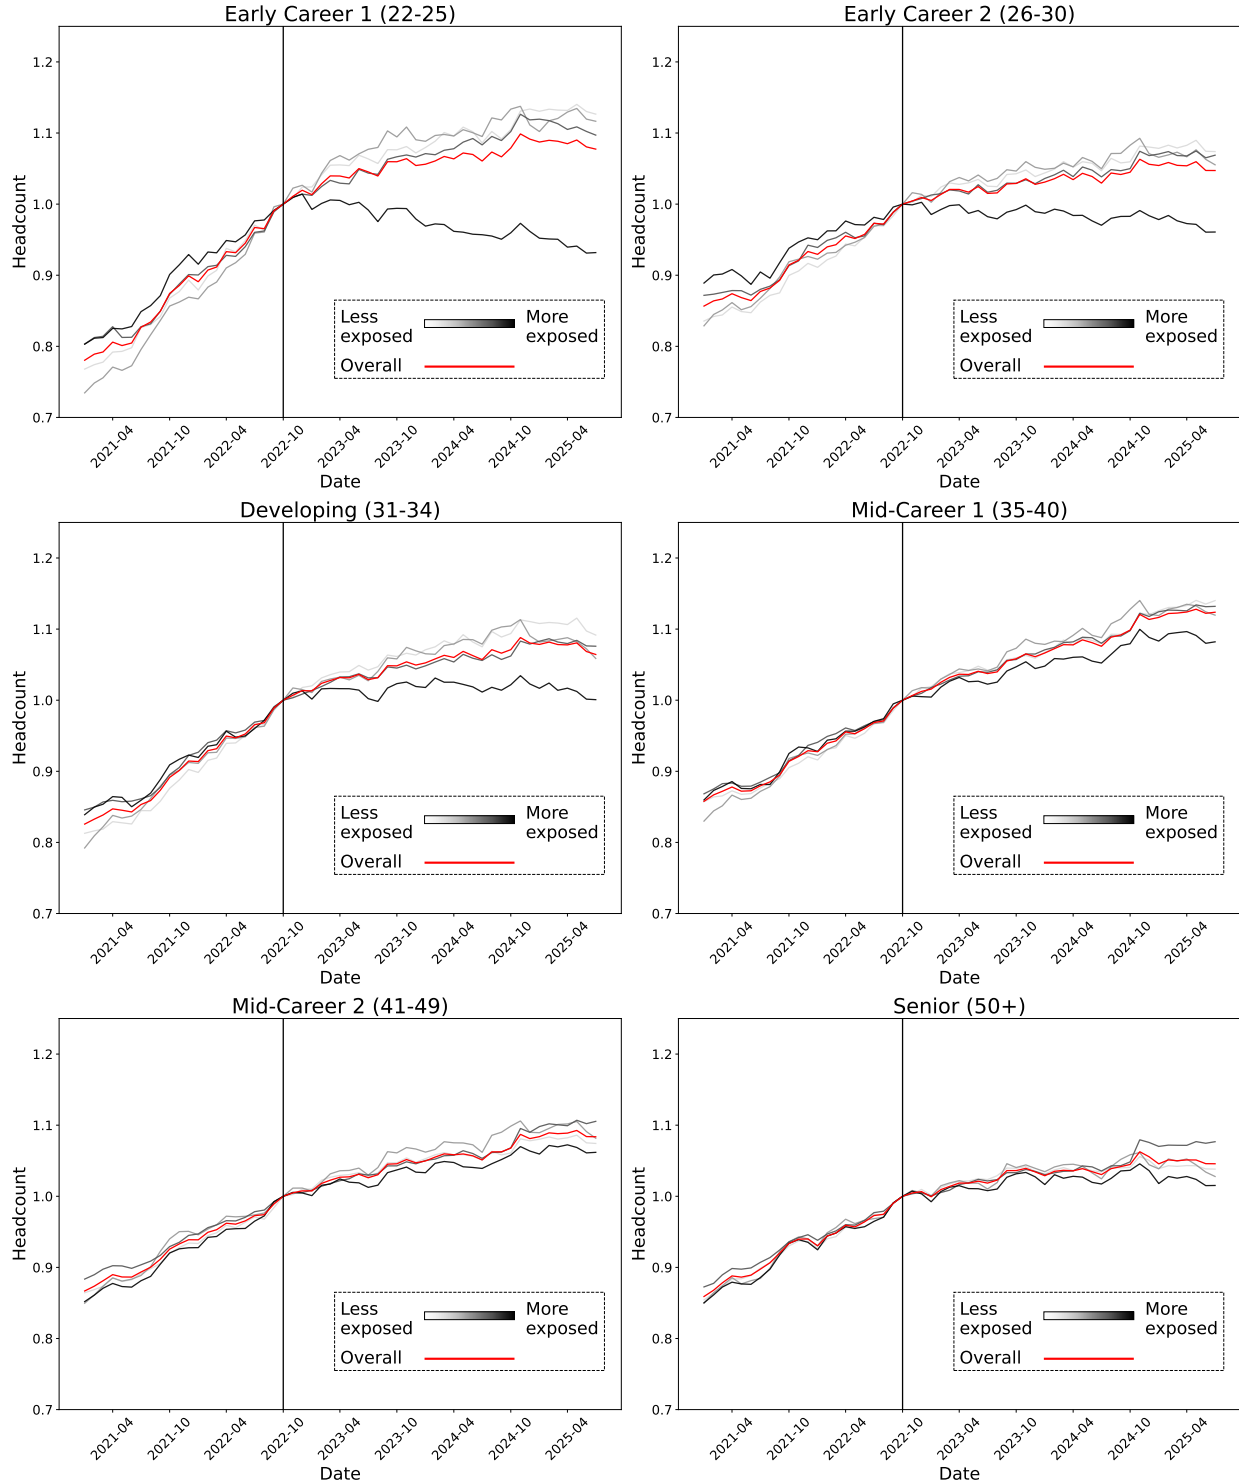

Figure A7: Employment changes by age and exposure group using measures from [Eloundou et al. \(2024\)](#). Including only non-teleworkable occupations according to [Dingel and Neiman \(2020\)](#). Note that very few non-teleworkable occupations fall in the highest exposure quintile. All occupations in the fourth and fifth quintile are consequently grouped together in level 4. The remaining quintiles are coded as 1, 2, and 3.

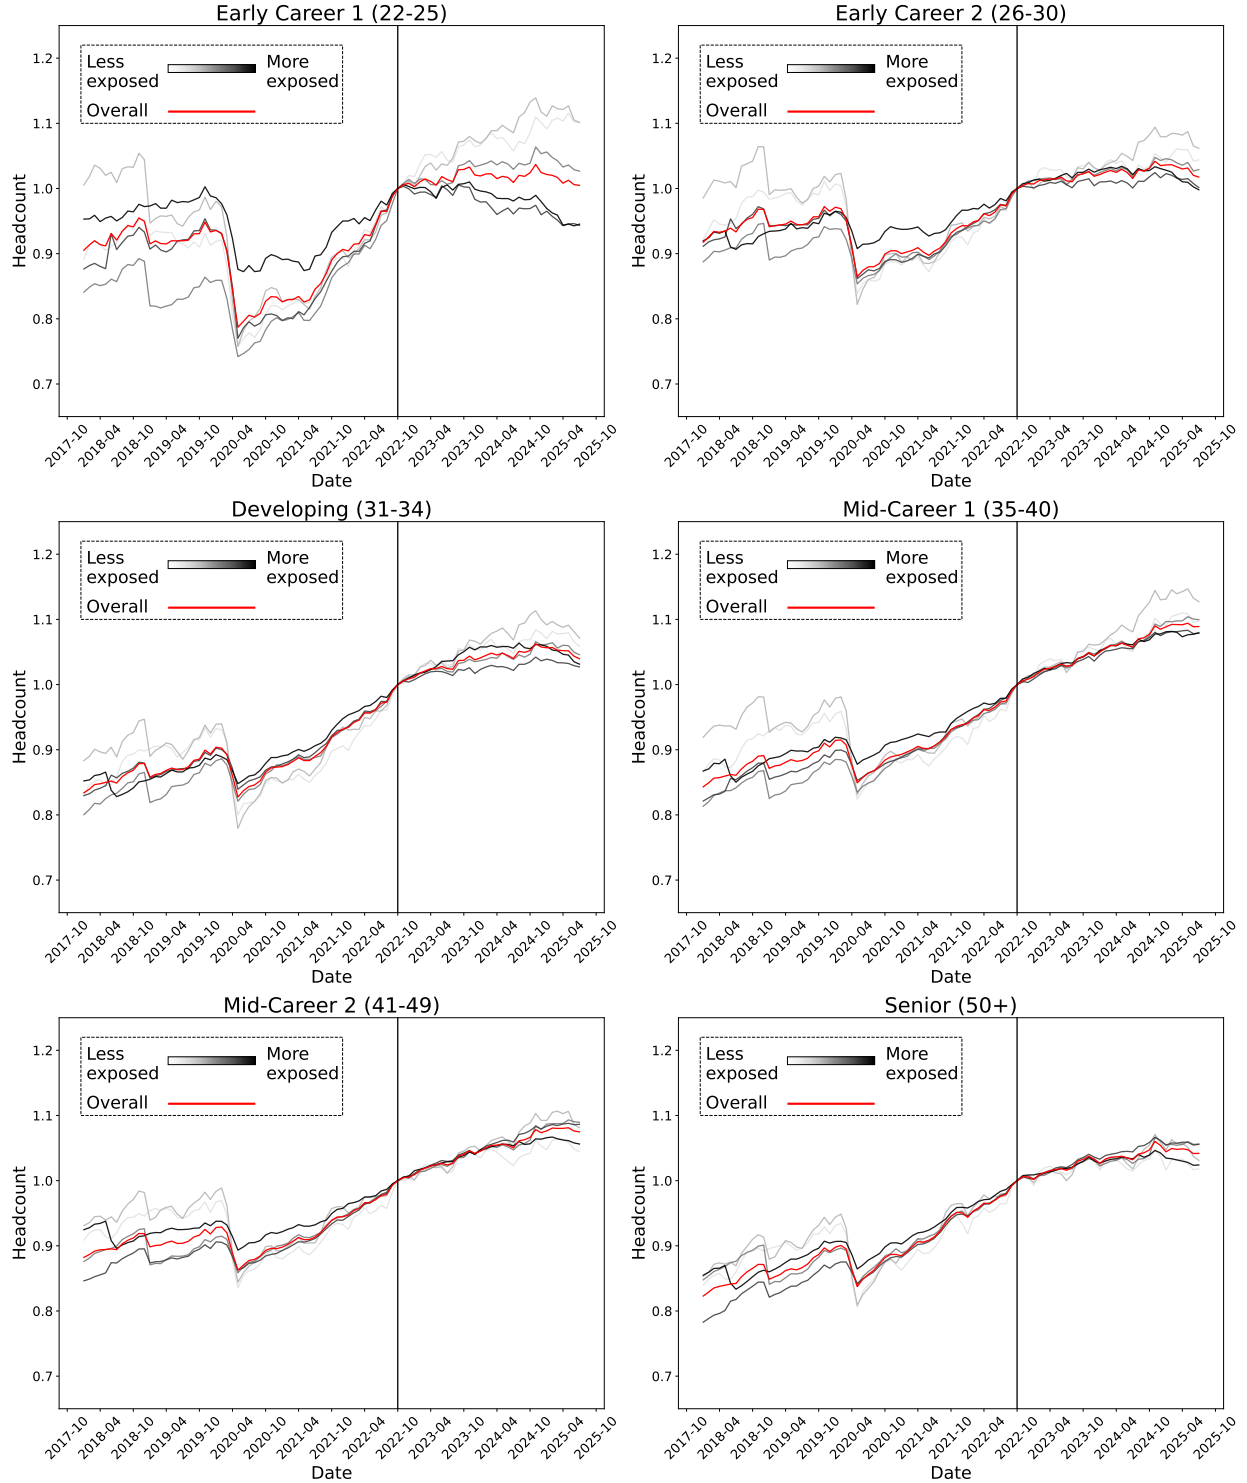

Figure A8: Employment changes by age and exposure quintile using measures from [Eloundou et al. \(2024\)](#). Data is from 2018 to 2025.

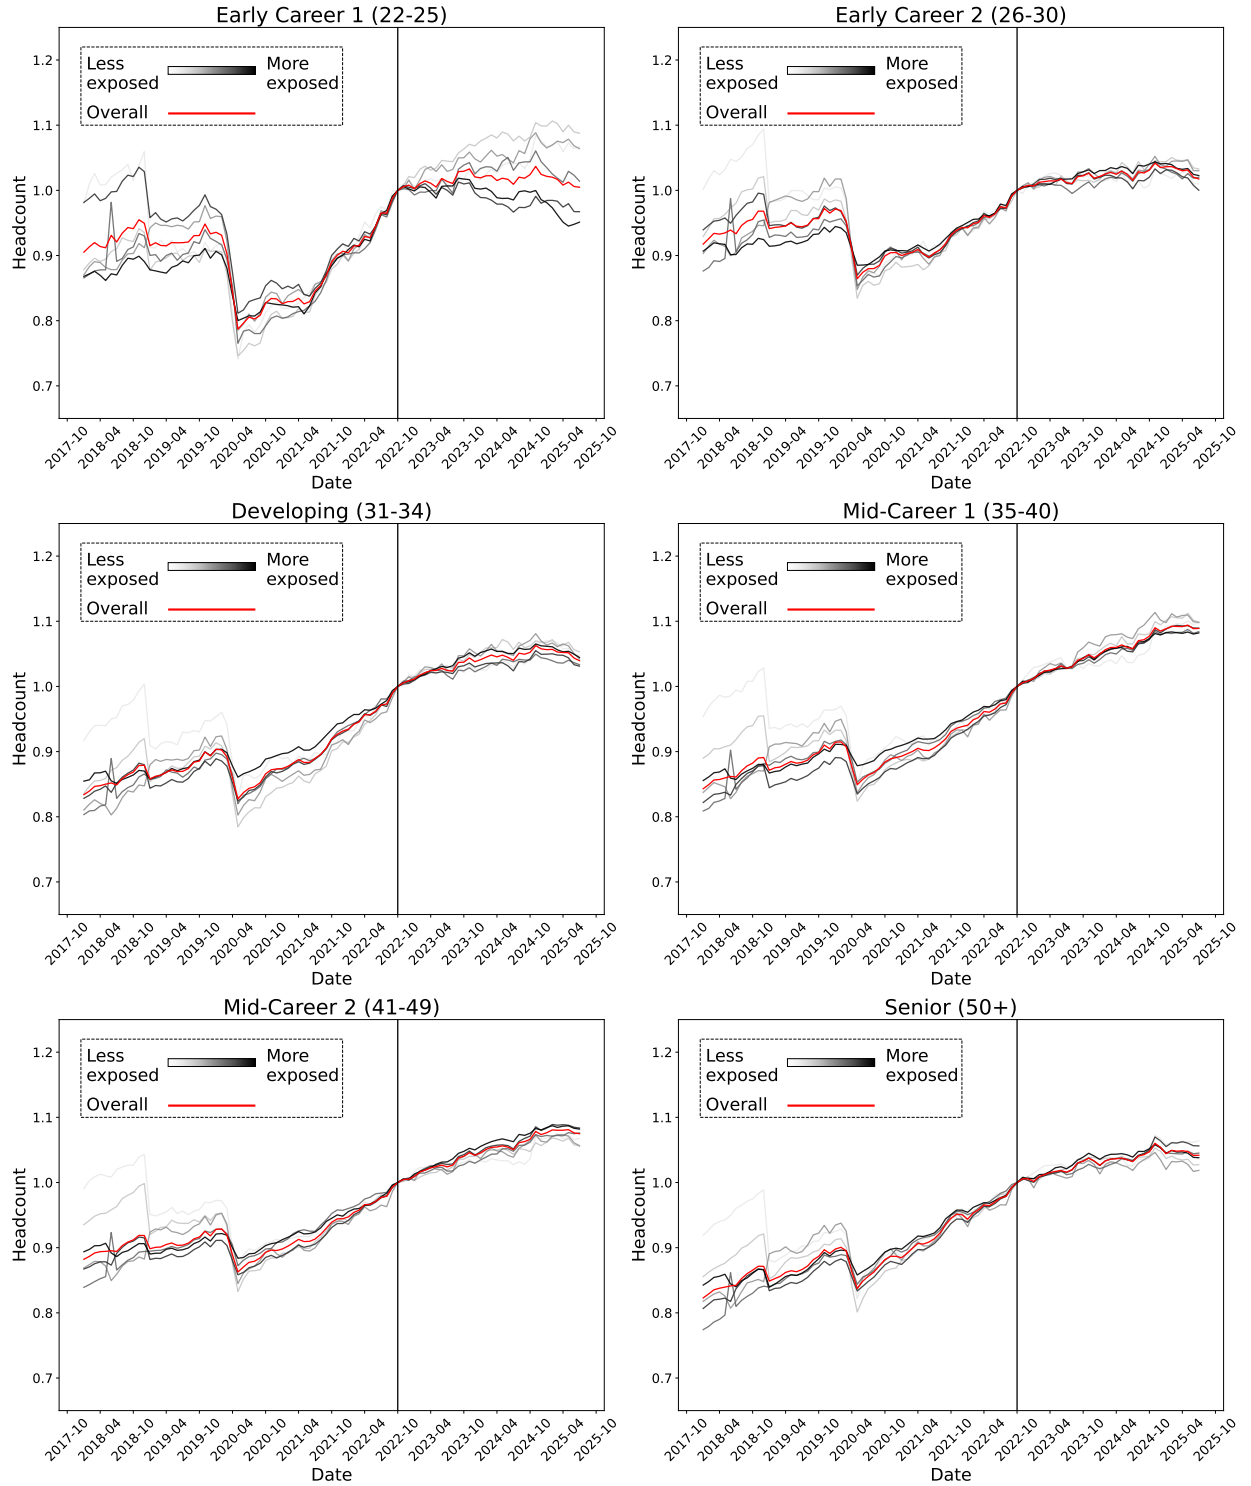

Figure A9: Employment changes by age and exposure quintile using Claude usage data from [Handa et al. \(2025\)](#). Occupations whose associated tasks all have fewer than the minimum number of queries to appear in the usage data are treated as a separate category, coded as 0. Data is from 2018 to 2025.

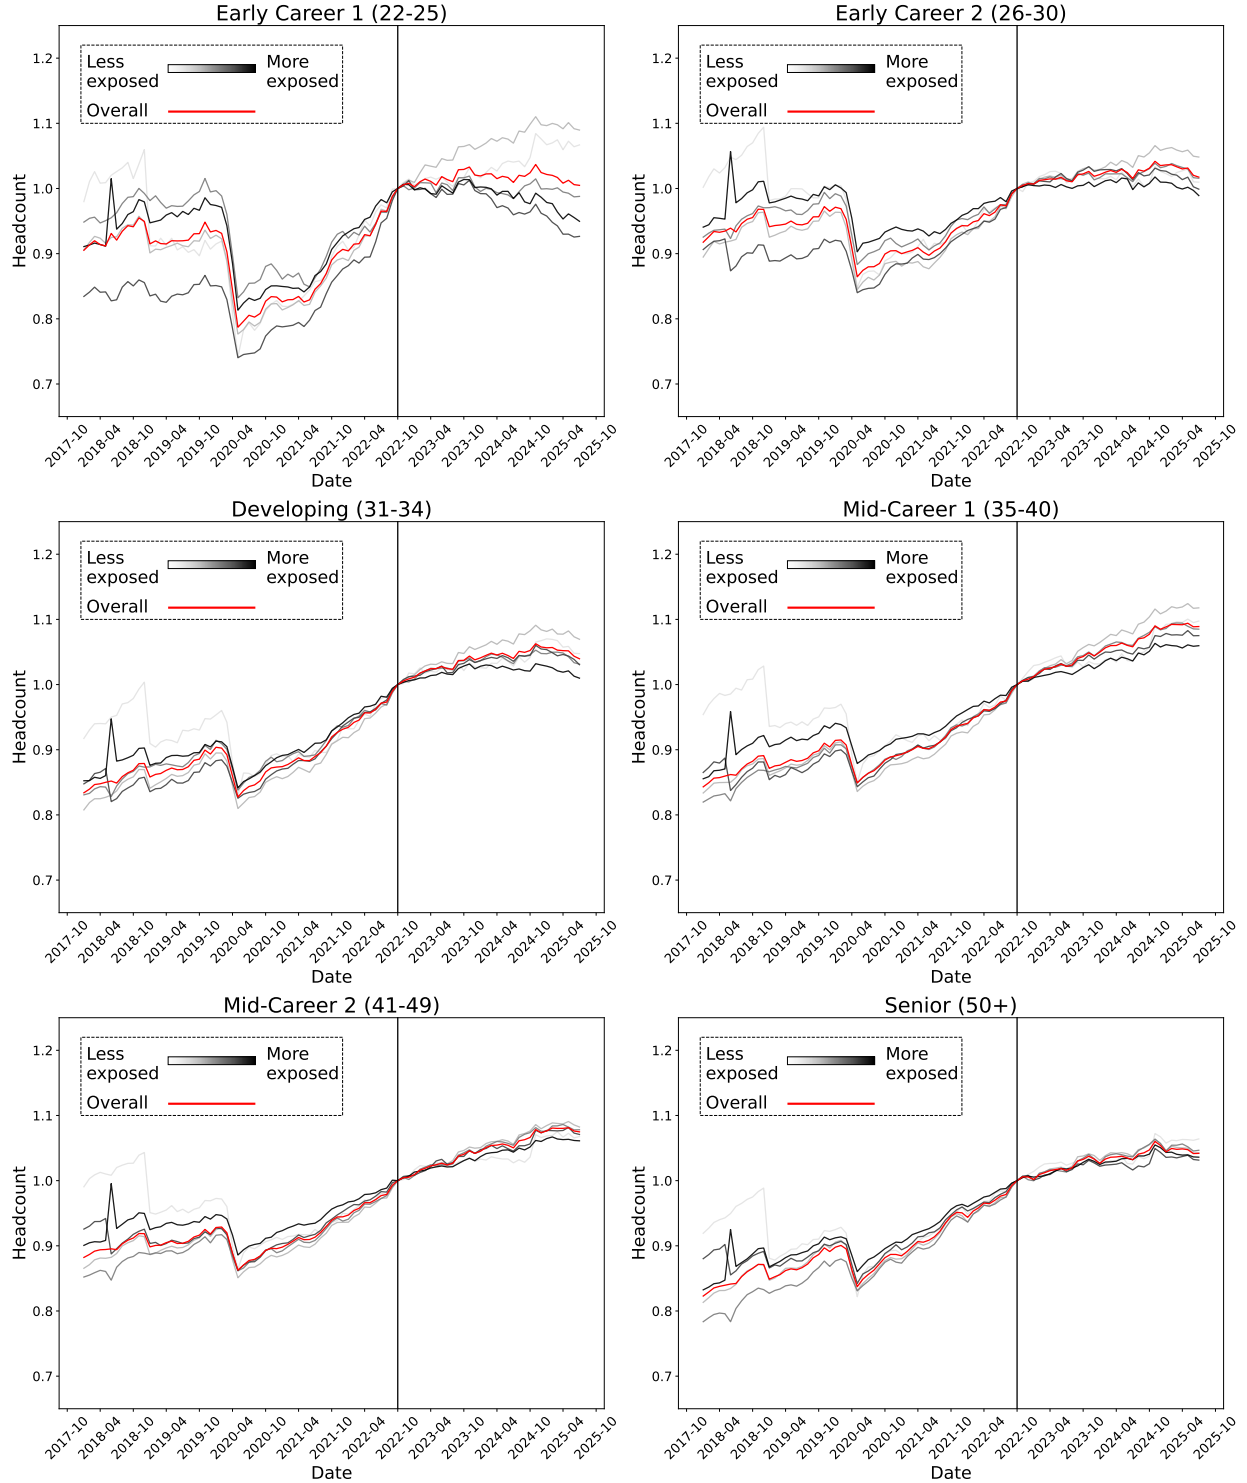

Figure A10: Employment changes by age and automation level using Claude usage data from [Handa et al. \(2025\)](#). Data is from 2018 to 2025.
