We also thank all other respondents who participated in the survey and contributed valuable task assessments.

We are further grateful to the peer reviewers for their constructive comments, which significantly strengthened the quality of this work:

Sergei Soares, Senior Economist, ILO Research Department

Aguinaldo Maciente, Employment and Labour Market Policies Specialist, ILO Office for Brazil (CO-Brasilia)

Jacek Bieliński, Deputy Head of the Department of Sociology, Assistant Professor, Institute of Sociology, Civitas University

Santiago Garganta, Senior Researcher, CEDLAS, IIE-FCE, National University of La Plata (UNLP).

Use of AI tools: We used various AI tools to generate task-level scores, as detailed in the paper. Additionally, we used GPT-4o, Gemini 1.5, and DeepSeek for code debugging in R, Python and JavaScript, suggesting text edits, and for translating tasks, occupational descriptions and the survey form from Polish to English (see Appendix). The writing and calculations are our own – and so are any errors.

► Advancing social justice, promoting decent work

The International Labour Organization is the United Nations agency for the world of work. We bring together governments, employers and workers to improve the working lives of all people, driving a human-centred approach to the future of work through employment creation, rights at work, social protection and social dialogue.
