9. **Office Clerks:** Drafting routine emails, letters, or documents using AI assistance (*AI Content Drafting*), Performing quality control on AI-generated text and documents (*AI Quality Review*), Using AI to extract information from documents or

summarize data for reports (*AI Data Insights*), Ensuring no confidential information is inappropriately shared with AI tools (*AI Ethics & Compliance*)

10. **Software Developers:** Using AI to generate code snippets, boilerplate code, or documentation (*AI Content Drafting*), Reviewing and testing AI-generated code to ensure correctness and security (*AI Quality Review*), Formulating specific prompts to guide AI in debugging or coding tasks (*AI Integration*), Fine-tuning the AI coding assistant by providing feedback and project-specific examples (*AI Integration*), Writing prompts for code generation (*AI Integration*)
11. **Teachers:** AI-assisted development of new course material and lesson plans (*AI Ideation*), Personalizing learning materials or feedback using AI insights from student performance (*AI Data Insights*), Adapting exams and assignments to account for AI tool usage (*AI Integration*), Integrating chatbots into lessons (*AI Integration*), Detecting AI-generated homework submissions (*AI Ethics & Compliance*)

For all broad categories, we include an “Other” subtask for each occupation (e.g., *AI Integration, Other*) to ensure that every broad category is represented across all occupations. In addition, we include a “non-AI” task category, which typically captures new assignments for the worker that are not novel within the broader workplace or profession. Examples include “meeting with customers,” “taking over tasks due to freed-up time,” or the more ambiguous “handling more complex tasks GenAI cannot solve.”

To categorize the free-text responses, we divided them between two independent coders. Each coder then cross-checked a random sample of the other’s work, with near-complete agreement.

Figures B.1 illustrate that AI chatbots have led to the creation of new tasks across all 11 occupations in our study. Figure B.2 shows that 53% to 91% of these tasks are directly linked to AI use. Figure 4 in the main text breaks down the composition of AI-related job tasks by occupation and task category.

Figure B.1: Workloads from AI Chatbots

Notes: This figure presents the share of workers who report increased workloads due to AI chatbots, distinguishing between additional tasks of the same type, new job tasks, or both. The responses are broken down by occupation and by whether employers encourage AI chatbot use. Panel (a) focuses on adopters (workers who have ever used AI chatbots for work), while Panel (b) examines non-adopters. *Sample:* All completed responses from the 2024 survey round linked to registry data.
