

I Survey Questionnaire

Our 2024 survey is organized into the four blocks summarized below. The 2023 round followed a similar structure.

Block 1: Occupation and tasks. Workers first select their occupation and report the importance of six representative tasks in their occupations.

Block 2: Adoption. Workers report their experiences with various AI chatbots, including the domains, frequency, and duration of usage.

Block 3: Employer initiatives. Workers are asked about any employer initiatives related to AI chatbots, including usage policies, enterprise chatbots, and employee training.

Block 4: Impact on work. Workers are asked about their experienced benefits and estimated effects of AI chatbots.

The section below contains our survey questionnaire. The questionnaire follows a common structure for the different occupations but with job tasks and titles tailored to each specific occupation.

For the sake of brevity, the questionnaire below focuses on one occupation (journalism), listing one of their six job tasks (write commentaries, columns, or scripts).

The English translation starts on page 72, with the original Danish version on page 77.
